

Did You Know.....

There are 5
potash exploration
projects in SEER.

Over the next
decade, SK Mining
Association
forecasts that the
provincial mining
industry will have to
hire between 9,200
and 21,000 workers.

For every job at a
mine, 2 jobs are
created elsewhere in
the local economy.

Potash mines draw
their labor supply
from within a 100
kilometer radius.

Potash Impact Study Informational Meetings

In an effort to explain the benefits and impacts of regional expansions in the potash mining industry, SEER has invested in a regional potash impact study to help communities and businesses prepare for future needs.

SEER, in collaboration with Derek Murray Consulting and Associates invites you to attend a community meeting near you to learn how potash mining will impact you, your community, or your business.
